

一些人認為患了癌症就意味著死亡，但實際並非總是如此。許多人在接受癌症治療之後過著長壽、健康的生活。科學家預計，在未來數年內，癌症幸存者的人數將會增加。在諸如篩查試驗（在症狀出現之前早期發現癌症的檢查）、早期檢測（當癌症較小並且沒有引起任何問題時早期發現癌症）以及癌症治療方面的改進，每年可使更多的人在患癌之後生存下來。戰勝癌症非常重要的一個環節是早期發現癌症。診斷出癌症越早，患癌之後長久生存的機會就越大。所以，請與您的醫生商談篩查試驗事宜，並詢問不同類型癌症的預兆。請記住，戰勝癌症是可能的！

Some people believe that having cancer means they will die, but that is not always true. Many people live long, healthy lives after they have cancer treatment. And scientists expect the number of cancer survivors to increase over the coming years. Improvements in screening tests (examinations that look for cancer early before symptoms), early detection (finding the cancer early when it is smaller and not causing any problems), and cancer treatment are things that allow more people to live following cancer each year. One very important part of surviving cancer is finding it early. The earlier the disease is diagnosed, the better chances are for living a long life following a cancer. So, talk with your doctor about screening tests, and ask about the warning signs of different types of cancer. Remember, it is possible to survive cancer!
