

Mayroong maraming iba't ibang uri ng medikal na pagsusuri at nangangailangan ang mga ito ng iba't ibang uri ng paghahanda. Halimbawa, ilang mga pagsusuri ay nangangailangan ng pag-aayuno habang ang iba ay hindi. Kausapin ang inyong doktor tungkol sa paghahanda para sa pagsusuri na nararapat para sa inyo.

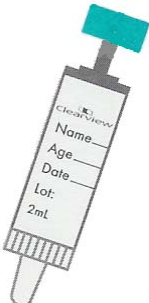

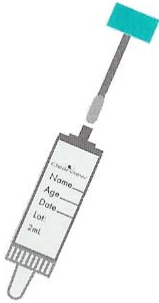

Pagkuha ng Sampol ng Dumi

(Stool Sample Collection)

<p>Buksan ang puting papel. Ilagay sa ibabaw ng tubig sa anidoro.</p>	
<p>Dumumi. Ang dumi ay nasa ibabaw ng papel. Buksan at iangat ang berdeng takip. Hilain ang stick.</p>	
<p>Kumuha ng sampol ng dumi bago lumubog ang papel at mabasa ng tubig ang dumi. Ikayod ang stick sa dumi.</p>	
<p>Tiyakin na ang may mga ukit-ukit o groove ng stick ay binabalot ng sampol ng dumi.</p>	
<p>Ibalik ang stick sa loob ng bote. Isara ng mahigpit ang berdeng takip. Huwag nang muling bubuksan. I-flush ang indoro. Hindi makakabara ang puting papel sa mga tubo.</p>	
<p>Ilagay ang bote at ang papeles ng lab requisition sa plastic bag at ibalik sa laboratoryo.</p>	

There are many different kinds of medical tests and they require different kinds of preparation. For example, some tests require fasting while other tests do not. Talk to your doctor about the test preparation that is right for you.

Stool Sample Collection

<p>Unfold white paper. Put inside toilet bowl on top of the water.</p>	
<p>Have a bowel movement. Stool will be on top of the paper. Twist and lift off the green cap. Pull out the stick.</p>	
<p>Take stool sample before paper falls and stool touches water. Scrape stool with the stick.</p>	
<p>Make sure the grooved part of the stick is covered with stool sample.</p>	
<p>Put stick back in bottle. Screw the green cap on tight. Do not reopen. Flush toilet. White paper will not harm plumbing.</p>	
<p>Put bottle and lab requisition in plastic bag and return to lab.</p>
